

BCP-XTP

Plenum Rated Pico Skew UTP (Unshielded Twisted Pair) Cable

Kramer's BCP-XTP, a plenum rated unshielded twisted pair (UTP) cable, is the ideal companion to Kramer twisted pair transmitter-receiver sets. BCP-XTP resembles typical CAT 5e, but with internal components optimized for transmission of video/audio signals rather than high-speed data.

FEATURES

- **Quality Construction** - Durable and flexible CMP plenum rated bulk cable, four pairs of solid 24 gauge copper.
- **Optimized for High-res Video/Audio Signals** - Four pairs are twisted at the same ratio so the actual length of each is identical. Note that BCP-XTP is not suited for high-speed data or network applications.
- **Optimized for Kramer Hardware** - Use with any of Kramer's wide range of twisted pair transmitter-receiver sets such as PT-110/PT-120, WP-110/PT-120, etc. Just terminate with RJ-45 connectors, or strip and attach to terminal strips or punchdown blocks as needed.
- **Long Distance Precision** - Video shift or "skew" is eliminated in long runs because the RGB color signals arrive at the same time.
- **Varied Selection of Lengths** - Available in pull-boxes of 100/300m (328/984ft).

Model	Description	Length Meter	
BCP-XTP-100M	Pico Skew™ UTP 4 Pairs 24 AWG Solid Pull-Box Plenum Bulk Cable	328'	100.0M
BCP-XTP-300M	Pico Skew™ UTP 4 Pairs 24 AWG Solid Pull-Box Plenum Bulk Cable	984'	300.0M
